Mr. Donald A. Nussbaumer
Assistant Director
State Agreements Program
Office of State Programs
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Nussbaumer:

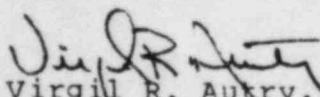

The response by Chem-Nuclear Systems, Inc. to your questions has been reviewed by our Department. We have only one comment regarding Question #10 of their response.

CNSI states that a minimum of 2 specimens are tested for each test performed. How do only 2 specimens provide adequate consistency checks? If the 2 vary, which one is correct? Shouldn't there be at least 3 specimens tested for each form of waste?

All other responses have been reviewed and determined adequate.

If we can be of any further assistance, please do not hesitate to contact our office.

Sincerely,

Virgil R. Autry, Director
Division of Radioactive Material
Licensing and Compliance
Bureau of Radiological Health
