Gentlemen:

Attached you will find our application, Form NRC-3131, for an amendment to our License Number 13-02841-03, along with our check for \$40.00.

Since the licensed material will be used in our Disamatic foundry for a revision in our method of pouring gray iron, it is necessary that we have the approved license as soon as possible. Our plant is scheduled to shut down July 23, at which time we hope to install the equipment requiring the amendment to our present license.

Any help that you can offer in expediting the approval of this application will be sincerely appreciated, and will assist us in developing a more efficient disamatic foundry pouring operation in these very competitive times for the foundry industry.

If there is any additional information that you might need, or we can help in any way in processing the enclosed application in a timely manner, please do not hesitate to call or write.

Thank you for any assistance that you can provide in processing this application.
