

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

DEC 29 1992

Docket 50-146

Mr. Ernest Fuller
RR 1 Box 216
Six Mile Run, PA 16679

Dear Mr. Fuller:

I am responding to your letter dated November 20, 1992, to Chairman Selin in which you requested clarification of the regulatory status of the Saxton Nuclear Experimental Corporation site, given your belief that the site did not fit into the same category as sites listed in the Site Decommissioning Management Program (SDMP).

I would like to confirm for you that the Saxton site is not in the same category as sites listed in the SDMP. The regulatory requirements for a reactor decommissioning are contained in Title 10 the Code of Federal Regulations (CFR), Parts 2, 20, 50, 51, and 73. In 1972, the Saxton Nuclear Experimental Corporation was issued a Part 50 "Possession Only License (POL)," which expires in the year 2000. The Saxton Nuclear Experimental Corporation's POL was issued before the implementation of the Decommissioning Rule in June 1988, and the Nuclear Regulatory Commission will not require the licensee to begin decommissioning immediately and relinquish its license before the license expiration date. Saxton has until the expiration of its license (the year 2000) to submit a decommissioning plan to NRC for review. Additional delays beyond the license expiration date would be subject to the requirements in 10 CFR 50.82 (b)(ii). In essence, these requirements would only allow further delays in final decommissioning, beyond the license expiration date, if such delays were necessary to protect the public health and safety.

It should be noted, however, that the licensee has the prerogative of submitting a final decommissioning plan before the expiration of its license. The NRC staff would then initiate a review of the licensee's submittal. In accordance with the regulations in Part 2, a notice of the licensee's proposed action would appear in the Federal Register. When all technical and environmental issues are properly addressed, the NRC will approve the licensee's proposed decommissioning plan.
