TO NRC OFFICIALS:

I wish to protest
strongly the notion of re-
starting TM-1 NUCLEAR
FACILITY while TM1-2 is
still being cleaned up.

Should an accident occur,
the whole site may have to be
abandoned during the cleanup.

Net ~~ed~~ can draw sufficient
power from other companies—

in the PJM system, and Penn-
sylvanians should not be exposed
to more hazards just to benefit
the utility investors

The investors should bear the
full costs of a clean-up. Taxpayers
nor customers, should neither have
to pay extra to cover this or
future accidents. ⁱⁿ Most cases, the
customers and taxpayers had no
choice when given utilities decided
to go nuclear.

I urge you and the board
to oppose any plans to make
taxpayers or customers, rate
payers, pay for Met. Ed's
bad investment.

Sincerely,

Virginia E. Burroughs
