RE: U.S. Nuclear Regulatory Commission Materials License Amendment

Please amend U.S. Nuclear Regulatory Commission Materials License Number 21-16425-01, under the heading "Conditions", to allow removal of spent ⁹⁹Mo - ^{99m}Tc generator cores contained within the lead generator shielding by Nuclear Lead Industries, 13305 Spencer Road, Milford, Mi 48042, USNRC Materials License Number 21-19623-01, provided the cores are one month past the generator calibration date. Nuclear Lead Industries is licensed by the U.S. Nuclear Regulatory Commission (#21-19623-01) to possess ⁹⁹Mo - ^{99m}Tc in the form of contamination inside generators. 30-18998

This amendment will provide us with the option of either disposing the spent ⁹⁹Mo - ^{99m}Tc cores in the lead shielding to Nuclear Lead Industries one month after the calibration date, or disposing the cores following the procedure described in our materials license. Enclosed is the forty (40) dollar amendment fee. Thank you for your help in expediting this amendment.
