Mr. James B. Devine, Assistant Director  
Export/Import and International Safeguards  
Office of International Programs  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: U.S. Nuclear Regulatory Commission Special Nuclear  
Materials Export License XSNM01770

Dear Mr. Devine:

The reference Special Nuclear Material Export License XSNM01770 allows the export to West Germany of 49,200 kilograms of uranium containing 1670 kilograms of uranium-235 enriched to a maximum of 3.45 weight percent. This material is for two reloads of nuclear fuel for Rheinisch-Westfälisches Elektrizitätswerk A.G. (Biblis A). Due to a new agreement to supply Biblis A with an additional four (4) load assemblies in 1982, Exxon Nuclear would like to increase the allowed export of uranium by 2300 kilograms of uranium, containing 81 kilograms of uranium-235 enriched to a maximum of 3.50 weight percent. Therefore, it is requested that the subject export license be revised to permit the export of 51,500 kilograms of uranium containing 1,751 kilograms of uranium-235 with a maximum enrichment of 3.50 weight percent.

If you have any questions with respect to this request, or if you need additional information, please contact me on (509) 375-7279.

Sincerely,

*G. R. Kiel*
