PROD. & UTIL. FAC.

DOCKET NUMBER 50-289  
PROD. & UTIL. FAC.

March 24, 1981

Mr. Joseph Hendrie  
U.S. Nuclear Regulatory Commission  
1717 H Street NW  
Washington, D.C. 20555

Dear Sir:

There are a great many unsolved problems surrounding nuclear power and I think you should heed the outcry of the people throughout the country as you consider licensing P.G. & E. projects - or any others, for that matter.

The TMI disaster points up many areas of my concern - mechanical safeguards failed, human errors were compounded by ignorance and vanity/self-preservation/cover-up, and woefully inadequate emergency procedures added to the panic and horror. There are also the unsolved problems about waste storage and decommissioning any given plant!

Requiring P.G. & E. to solve these  
problems before licensing them is  
certainly reasonable - and the delay  
will be minor in relation to the long-  
term benefits of safe nuclear power.

Sincerely,  
Barbara Gunn
