Joseph Hendrie, Chairperson
U.S. Nuclear Regulatory Commission
1717 H Street
Washington, D.C. 20555

Mr. Hendrie,

I am opposed to the reopening of TMI Unit 1, TMI Unit 2, and all other currently closed nuclear power plants. I would also like to see that all nuclear facilities- commercial and military- are shutdown permanently, quickly and safely. The horror of TMI cannot be washed down the Susquehanna River into the life around it without questioning the purpose and meaning of those behind such destructive action. All LIFE and MOTHER EARTH exist within all of us, we must be Loving and live for the good of all Life. This is so simple, yet so hard. Do shut down TMI FOREVER!!!

Many people have already given their lives, some unknowingly, to the demands of progress that calls for nuclear power. Animal life, plant life and any other life forms of which we do not know have suffered without question or chance. I feel very responsible and want to live to see my family of life live peacefully and safely. I will do what I can to ensure their loving lives.

Thank you for your time. Again I want to express my want and need to permanently shut down TMI Unit 1, TMI Unit 2 and all nuclear facilities. MOTHER EARTH and I are ONE.

Sincerely,

Ann Osllslo
