

March 28, 1981

To the Members of the
Nuclear Regulatory Commission -

Today, the 2 year anniversary of the accident at 3 Mile Island, seems appropriate for many of us to express our concern that the public must retain our right of input into the licensing procedure of nuclear plants. If we are indeed to call this country of ours a democracy of, by and for the people, the people must have input into the types of energy systems being built in our communities.

Sincerely, Patricia M. Tioxell
