

UNITED STATES GOVERNMENT

Memorandum

TO : File

DATE: September 17, 1965

FROM : A. G. Johnson, Radiation Specialist
Region V, Division of ComplianceSUBJECT: EVALUATION OF INSPECTION AS PER MANAGEMENT MEMO 900-15
DEPT. OF THE ARMY
HEADQUARTERS,
U. S. ARMY, ALASKA
APO 949, SEATTLE, WASHINGTON
LICENSE NO. 50-10023-1

CO:V:AGJ

The inspection of the subject licensed program on September 1, 1965 indicated that the majority of the licensee's operation is concerned with collection and transfer of radioactive waste rather than actual radioactive waste disposal. Two items of noncompliance were observed which were concerned with records of receipt and labelling of waste containers. The licensee's program appears to be operated by knowledgeable and interested individuals who are conscious of the radiation safety requirements for an operation of this type. The items of noncompliance were not significant from a health and safety standpoint. A review of the complete program indicated no health and safety problems.
