RE: Renewal of Material License No. 34-06002-01

Gentlemen:

Following your reminder notice on the impending expiry of our material license, we had our Medical Radiation Physics Consultant review all records and he recommended submission of a complete renewal application. He has prepared the new application for renewal and supplementary information, which makes some reference to the previous materials submitted by us in connection with the license renewal and/or license amendment. We sincerely hope that this provides you the complete and adequate information in processing the renewal of our license.

Please note that the amount of sealed source activity requested, Item 5 E. on page 1 of the supplementary information, is higher than what was approved in our current license. We are in the process of adding a complete radiation oncology facility at Holzer Medical Center, at which time we would also intend to provide the opportunity for interstitial brachytherapy using Iodine-125, Iridium-192, etc., besides increasing the use of intracavitary brachytherapy using Cesium-137 sealed sources. When the planned radiation oncology facility is complete, we plan to turn over the department to physician(s) trained and certified in straight therapeutic radiology. When such arrangements are complete we will contact your office with necessary information to include these individuals as authorized users on our material license. Until such time, we do not hope to practice any brachytherapy using these sources to add to our present stock of brachytherapy sources.

A check in the amount of \$150.00 is enclosed as payment towards the license renewal fee. Should you have any questions regarding the material submitted for our license renewal, please contact our Chief Technologist, Nuclear Medicine, Ken Moore, (614) 446-5144, Monday through Friday, 8:00 a.m. to 4:30 p.m.

Sincerely,

*Charles I. Adkins, Jr.*
