September 2, 1966

Commanding General  
U. S. Army, Alaska  
APO Seattle, Washington 98740

Attention: **ASACT-C**

Subject: INSPECTION OF AEC LICENSE NO. 50-10023-1

Gentlemen:

Region V, Division of Compliance, U. S. Atomic Energy Commission is responsible for conducting radiological health and safety inspections of AEC licensees in the western states. These inspections are made to assure that AEC licensed activities are performed in a safe manner, and in accordance with license conditions and AEC regulations. These inspections include an examination of equipment and facilities, a review of pertinent records, discussions with personnel, and in some cases, observation of actual use of radioactive materials.

This is to inform you that I will be in your area making inspections during the period September 21 and 22, 1966. I plan to inspect your activities authorized by the subject license on September 22, 1966.

In order to facilitate the subject inspection, I would like to request a theater clearance. The enclosed data is sent in support of this request. Unless otherwise instructed, I plan to contact the Chief of the GMA Division upon my arrival.

Sincerely yours,
