

July 16, 1970

U. S. Army, Alaska
Attention: ARAST-C
APO Seattle, Washington 98749

Attention: Commanding General

Subject: INSPECTION OF AEC LICENSE NO. 30-10023-1

Gentlemen:

Region V, Division of Compliance, U. S. Atomic Energy Commission is responsible for conducting radiological health and safety inspections of AEC licensees in the western states. These inspections are made to assure that AEC licensed activities are performed in a safe manner, and in accordance with license conditions and AEC regulations. These inspections include an examination of equipment and facilities, a review of pertinent records, discussions with personnel, and in some cases, observation of actual use of radioactive materials.

This is to inform you that I will be in Alaska making inspections during the week beginning September 14, 1970. I plan to inspect your activities authorized by the subject license on the morning of September 17.

Please advise me of the proper person to contact on my arrival at Fort Richardson.

Sincerely,
