IN REPLY REFER TO:  
333:WCC:ern  
4220

From: Commander, Naval Surface Weapons Center  
To: U.S. Nuclear Regulatory Commission  
Division of Fuel Cycle and Material Safety  
Uranium Licensing Branch  
Washington, DC 20555

Subj: Addendum to NRC Special Nuclear Material License 1147

Ref: (a) Telecon of 26 March 1981 between Mrs. B. Kosla of NRC and  
Mr. W. Cobbin of NSWC

1. In response to reference (a), please combine the Naval Surface Weapons Center's Special Nuclear Material Licenses 1147 and 1298. The combining of these two licenses will save time and effort in future renewals and/or amendments.
2. Also in response to reference (a), the minimum technical qualifications for the Radiation Safety Officer (RSO) are (a) a Bachelor's degree in a field of natural science or engineering and four years of progressive technical experience in the field of health physics, or (b) a combination of education and experience including six years of progressive technical experience in the field of health physics and education that provides an understanding of sciences applicable to the field of health physics comparable to that which would have been acquired through completion of a full four-year college curriculum.
