Dear Sir:

It has been brought to my attention that your office is planning to sell various metals that have been tainted with "low enriched uranium" and technetium-99. I want you to know that I oppose such selling of this material. This could very well be mixed with scrap in which steelworkers could breath some of this radioactive material. I favor the continued process of burying this type of material in which no danger can be made to steelworkers.

Very truly yours

Edward J. Havrilla
