Associates in Radiology, Inc.  
ATTN: John C. Melnick, M.D.  
1027 Boardman-Canfield Road  
Youngstown, OH 44512

Gentlemen:

Enclosed is Amendment No. 03 to your NRC License No. 34-16621-01 in accordance with your request.

Please note that V.A. Raval, M.D. and A. Hafiz, M.D. have not been authorized iodine-131 under the uses of Group IV. Appendix A of Regulatory Guide 10.8 encourages physicians to obtain their training in formal accredited residency programs, but does provide for training obtained in other types of programs within a medical institution. However, training must be obtained in an institutional nuclear medicine program (i.e., one licensed pursuant to Section 35.11) under the supervision or tutelage of one of the authorized physicians named as a user on the institution's license. Clinical training may not be obtained in a nuclear medicine program conducted under a so-called "private practice" license, because these licenses do not authorize the licensee to conduct such training programs or to use licensed material under the supervision of the authorized user.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.

MAY 24 1985

6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
