EVENT DESCRIPTION AND PROBABLE CONSEQUENCES

At 1625 on 4/8/81, radiation monitors R11 and R12 were declared inoperable when a supply breaker to a motor control center which provides power to R11 and R12 was inadvertently opened. Tech. Spec. 3.4.6.1 requires R11 and R12 to be operable. Tech. Spec. 3.4.6.1 action statement requirements were met. The health and safety of the general public were not affected by this occurrence.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS

This incident is attributable to personnel error. A Unit 1 breaker was inadvertently opened rather than the Unit 2 breaker which was specified in the tagging order. The Unit 1 breaker was closed and R11 and R12 were returned to service at 1715 on 4/8/81. This incident has been discussed with most electrical maintenance personnel and it will be discussed with the remaining electrical maintenance personnel. Further investigation
