RE: NRC License #29-03047-01 Renewal

Dear Mr. Glenn,

Please find enclosed a check for \$580.00 as per 10CFR 170.31 (7) (c) and supporting documents to initiate the renewal of NRC License #29-03047-01.

We would like to elect your alternate method of license renewal after reviewing our current status through amendment #51. (Letter dated April 10, 1989)

Also enclosed are documents to support the addition of Peter A. Ross, M.D. as authorized user for medical use - Item 7.

The licensee also request one use of I-125 to be used with eye plaque for medical use in temporary eye implants with the associated adherence to appropriate radiation safety procedures.

Your prompt attention and review along with a continuance letter of our present license activities are greatly appreciated.

Sincerely,

Jeffrey Moll
