Commissioner Ahearne

- 2 -

As a general note, the staff evaluated the SIR in response to Commission request on the basis of available information. Although NMSS believes the conclusions reached in this analysis are supported, they are not based on current information and they may be out-of-date. In response to the recent Commission decision on SECY 78-35A, the staff has prepared a letter to State Department asking for further information. When this information is available to NMSS staff, staff conclusions will be updated and refined.

Incidentally, although Mr. Rosenzo's criticism of Table V is unjustified, his conclusion with regard to the Tarapur reactors is not inconsistent with information available to NMSS.

IP has no objection to this paper.

~~(Signed)~~ William J. Dircks
