Attention: Mr. D. G. Wiedeman
Chief of Nuclear Materials Safety Section I

Dear Mr. Wiedeman:

This letter is written in response to your correspondence of May 16, 1985, and is being presented as written response to "Notice of Violation" of the same date.

Violation No. 1: Radiographic Administrators semi-annual reviews will be performed beginning on June 3, 1985. This review, and subsequent reviews, will be performed on the same date as our semi-annual leak tests, so that the date(s) required will not be forgotten. The attached form will be utilized for these reviews, and will become a permanent record in the Radiographic files.

Violation No. 2 and 3: No written response required.

Violation No. 4: Technical Operations model 492D Gamma Alarm and accompanying wiring diagrams have been ordered to satisfy the "radiation activated" visible signal requirements. Delivery date is unknown at this time, we estimated 3 - 6 weeks. Installation will be done by our own Radiographic Maintenance Engineer once the unit is delivered.

I hope the above responses meet with your approval. If you have any further questions, feel free to contact me.

Sincerely,

MAYNARD STEEL CASTING COMPANY

Dennis M. Treder
