RE: Nuclear Diagnostics, Inc.  
License Application Item No. 5B

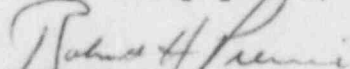

Dear Mr. Mallett:

We have authorized Nuclear Diagnostics, Inc., 29 West 281 Calumet, Warrenville, IL 60555, to utilize space at our facility, for receipt and storage of radiopharmaceuticals and radionuclides.

The room, which is our Nuclear Medicine room, located across from X-ray Room 1, in our Radiology Department, will be utilized by and totally administered by Nuclear Diagnostics, Inc. personnel. Hospital personnel will only enter the room under emergency situations. All radioactive material that enters or leaves Cole Hospital will be the sole responsibility of Nuclear Diagnostics, Inc., and not Hospital personnel.

Hopefully, this will clarify Item No. 5B. Should you have any questions or require any additional information, please contact me at your convenience.

Very truly yours,

  
Robert H. Pierce  
Administrator
