William Adam, Ph.D.
Material Licensing Section
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Dr. Adam:

Please amend our license No. 24-16617-01 MD, Kansas City, Missouri, to include the following items.

1. Please remove Bernard Mertes as our Radiation Safety Officer and add Stephen Potter as the RSO. Stephen has been a licensed user since 1981 and is the present manager of the Kansas City facility.
2. Please add Karl Artinger as authorized to calibrate survey meters and handle sealed sources for calibration while in an authorized Syncor facility. Enclosed is the documentation of his training and experience.
3. Please increase our possession limit of 137-Cesium to 1.5 Ci. This is to allow us to receive the calibration source from our Houston facility. The source is a 1.2 Curie, J.L. Shepherd and Associates Model 28-6A calibration source, serial #10066. Enclosed is specific source information and handling procedures for the source.

If you have any questions concerning the attached information, please do not hesitate to contact me.

Sincerely,

Stephen Potter, R.Ph.
Manager/Kansas City Facility
