Subject: Operator Licensing, License No. R-37, Docket No. 50-20

Gentlemen:

This concerns the requalification examination administered at the Massachusetts Institute of Technology (License No. R-37, Docket No. 50-20) on 12/07/92. The examination was prepared by MIT and submitted to NRC for review. Please be advised that two changes are needed in that exam:

- a) Questions No. B7 and B8 have no correct answer and should be deleted.
- b) Question No. B2 has two correct answers, item (b) and item (c).

Please contact me should there be any questions. We appreciate the professional manner in which NRC has conducted these requalification examinations.

Sincerely,

John A. Bernard, Ph.D.  
Director of Reactor Operations
