Pursuant to my telephone conversation of September 13, 1990 with Trisha Haverkamp of your office, we are annotating our records to reflect that application for renewal of the above-referenced Radioactive Materials License has been submitted to your agency on a timely basis, and that the License will remain in effect until final action is taken.

If your understanding of the above is any different, please contact us immediately. If we do not hear from your office within ten working days from the date of this letter, we will assume that our understanding of this conversation is correct.

Very truly yours,
