Rotterdam, 2nd April, 1981.

Your letter dated March 19th, 1981.
Docket No. 99900039/80-02.

Gentlemen,

In response to your above letter we herewith give you the required additional information.

1. Additional information to item A :

To prevent recurrence of NDE personnel not following the procedure requirements we instructed the QA Engineer, Level III NDE, who is responsible for the NDE training, to organize short course which is planned to be held before May 1st, 1981. A copy of the memo is attached to this letter (see Attachment 1).

2. Additional information to item B :

Through the termination of nuclear work by RSV-A it is not expected that many nuclear items shall be hoisted in our workshop. However in case it does occur we issued a Memo requesting the Manager Manufacturer to verify before lifting a nuclear item, that all hoisting equipment to be used is part of the administration system for control and maintenance of hoisting equipment (see Attachment 2 of this letter).

To our opinion this additional information completes the RSV-A response. Should you have any further questions, please do not hesitate to contact us.

Yours faithfully,

RSV Zware Apparatenbouw b.v.

8105200/18

Volg nr.:	Memo to Mr. P.C. de Ruiter, Manager Manufacturing.				Info
	During NRC audit it was found, that not all hoisting equipment such as ropes and hooks were part of the administration system for control of hoisting equipment maintained by RDM-Onderhoud.				Aktie door:
	To avoid the risk that equipment is used that is not controlled as described in Quality Procedure 9.15.01, I request you to verify, before any nuclear item is hoisted, that the hoisting equipment to be used is indeed part of that system.				
	 M. Lodder Manager QA.
