BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 AND 50-324
LICENSE NOS. DPR-71 AND DPR-62
REQUEST FOR LICENSE AMENDMENT
ENVIRONMENTAL TECHNICAL SPECIFICATIONS

Dear Mr. Ippolito:

Summary

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Environmental Technical Specifications (ETS) for its Brunswick Steam Electric Plant (BSEP) Unit Nos. 1 and 2. These changes are to delete Sample Station No. 36 and its related sampling requirements from the Brunswick ETS.

Discussion

Section 4.2 of the Brunswick ETS states that any location from which milk can no longer be obtained may be dropped from the surveillance program. The farmer at Sample Station No. 36 has gone completely out of the dairy business and his milk cows are no longer available for sampling. We are therefore requesting revisions to the Brunswick ETS to delete Sample Station No. 36.

Impact Evaluation

Since Sample Station No. 36 is only a monitoring point for plant releases and has no interface with the operation of plant systems, its deletion will have no impact on plant design bases nor on previously-evaluated postulated accidents or their consequences.

Conclusion

Enclosed you will find the revised ETS pages with the changes indicated by vertical lines in the right-hand margins. These requests are administrative in nature and thus constitute one Class I amendment and one Class II amendment in accordance with 10CFR170.22. Accordingly, our check for \$1,600 is enclosed.

Should you have any questions regarding this matter, please contact my staff.

Yours very truly,

E. E. Utley
