James E. Hyder, Radiation Specialist
Region IV, Division of Compliance, Denver

ORIGINAL SIGNED

by JAMES E. HYDER

DEPT. OF THE AIR FORCE, USAF SPECIAL WEAPONS CENTER, KIRTLAND
AFB, ALBUQUERQUE, NEW MEXICO - LICENSE NO. 30-03110-02 AND
LICENSE NO. 22M-597 - HEALTH AND SAFETY EVALUATION

An announced reinspection of the subject licenses was conducted on March 11 and 12, 1968. The only items of noncompliance involved failure to leak test all sealed sources at intervals of six months or less, and failure to maintain records of the results of these leak tests in units of microcuries.

It is not felt by this inspector that these two deficiencies indicate any serious health and safety problems and no other potential problem areas were identified during this inspection.
