

VELSICOL CHEMICAL CORPORATION

341 EAST OHIO STREET • CHICAGO, ILLINOIS 60611 • 312-670-4500

April 9, 1981

Mr. James Keppler, Director
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Keepler:

Pursuant to our discussion with the members of your staff on March 6, 1981, and in accordance with your March 20, 1981, letter to Velsicol, we hereby submit for your review what we believe is a complete radiological package on Areas A, B1, and B2 of the former Michigan Chemical Corporation plant site in St. Louis, Michigan.

If, after reviewing the enclosed package, the NRC has no objections to the proposed work, Velsicol will initiate demolition and other construction work while a final radiological assessment is completed on the remainder of the site.

The enclosed package of material consists primarily of the data developed by Harold Galbraith, which was provided to you on March 6, 1981. It has been restructured in a more comprehensible form and augmented by additional data collected by Dames & Moore to fill gaps in the original data.

If you have any questions, please feel free to contact me.

Sincerely,

VELSICOL CHEMICAL CORPORATION

David B. Graham
