Gentlemen:

This is in reference to your application dated November 30, 1987 and your letter dated May 10, 1988 to renew License No. 20-01212-10. In order to continue our review, we need the following additional information:

1. Your responses to our questions concerning radiation protection surveys are not sufficiently detailed nor do they contain commitments. Your license is not of Broad Scope and we expect you to be more specific on quantities of byproduct materials handled and the type and frequency of radiation surveys that are required.
2. You have not indicated a frequency of film badge exchange nor have you answered our questions concerning issuance of personnel dosimetry as requested in our original January 20, 1988 letter, question 7. Please provide the missing information.
3. Please note that based on the information on training and experience submitted for Dr. Valerie White we will restrict authorization to those of low energy beta emitting isotopes. Dr. Mark Lating has not indicated any experience with byproduct material and should not be authorized as a supervisor of byproduct material use. If you desire additional authorizations please submit additional records of experience.

We will continue our review upon receipt of this information. Please reply in duplicate to my attention at the Region I office and refer to Mail Control No. 108090.
