

DEC 30 1992

Docket No. 70-1100

Mr. Gary Kersteen  
Uranium Plant Manager  
Windsor Nuclear Fuel Manufacturing  
Combustion Engineering, Inc.  
1000 Prospect Hill Road  
Windsor, Connecticut 06095-0500

Dear Mr. Kersteen:

Subject: NRC Inspection No. 70-1100/92-03

An announced safety inspection of NRC-licensed activities was conducted at your facility by Messrs. J. Roth, C. Gordon and J. Noggle between November 16 and December 1, 1992. The inspection findings were discussed with you, Mr. S. Junkrans, and other members of your staff on November 17 and December 1, 1992.

Areas reviewed during the inspection are important to health and safety and are discussed in the enclosed inspection report. These areas included review of operations, observation of the biennial emergency preparedness (EP) exercise, decommissioning activities, and preparation of the Windsor Fuel Manufacturing Facility Decommissioning Plan.

During the exercise, the ability to implement the Emergency Plan and the Emergency Plan Implementing Procedures in a manner that would provide adequate protective measures for the health and safety of the public was demonstrated. Areas for improvement relating to performance and control during the EP exercise, to decommissioning activities, and to preparation of the Windsor Fuel Manufacturing Facility Decommissioning Plan were identified. However, within the scope of this inspection, no safety concerns or violations of regulatory requirements were identified.
