

JUL 25 1985

Docket No. 50-254

Docket No. 50-265

Commonwealth Edison Company

ATTN: Mr. Cordell Reed

Vice President

Post Office Box 767

Chicago, IL 60690

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. G. Brown and J. Patterson of this office on June 24-28, 1985 of activities at Quad Cities Nuclear Generating Stations, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-29 and No. DPR-30, and to the discussion of our findings with Mr. N. Kalivianakis and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation with NRC requirements, as specified in the enclosed Appendix. A written response is required.

In addition to the noncompliance, we are concerned that most of the individuals interviewed during the inspection displayed an inadequate level of knowledge to meet your training program objectives. Therefore your response to the noncompliance should address what measures you are taking to improve the effectiveness of your training program to ensure that the training objectives described in Section 8.2 of the Generating Station Emergency Plan (GSEP) are met.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
