

July 28, 1975

Kerr-McGee Nuclear Corporation  
ATTN: Mr. W. J. Shelley, Director  
Regulation and Control  
Kerr-McGee Building  
Oklahoma City, Oklahoma 73102

License No. SUB-1010  
Docket No. 40-8027

Gentlemen:

This refers to the inspection conducted by Richard L. Bangart of this office, on July 7, 8 and 9, 1975, of the activities at your Sequoyah Facility authorized by NRC Source Material License No. SUB-1010, and to the discussion of our findings held by Mr. Bangart with Messrs. B. E. Brown and C. A. Grossclaude on July 9, 1975.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements and observations by the inspector.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith. These items of noncompliance have been categorized into the levels as described in the correspondence to you dated December 31, 1974.

This notice is sent to you pursuant to the provisions of Section 2.201 of the NPC "Rules of Practice", Part 2, Title 10, Code of Federal Regulations. Section 2.201 requires you to submit to this office, within twenty (20) days of your receipt of this notice, a written statement or explanation in reply including: (1) corrective steps which have been taken by you and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved.
