Kerr-McGee Nuclear Corporation
ATTN: Mr. W. J. Shelley, Director
Regulation and Control
Kerr-McGee Center
Oklahoma City, Oklahoma 73125

Gentlemen:

This is to confirm a telephone conversation on March 29, 1976 with your Mr. W. J. Shelley regarding the review status of your application to renew Source Material License No. SUB-1010.

A preliminary review was started on your application in the fall of 1975, however, because of a higher priority project the manager conducting the review was reassigned. At this time your renewal application is on hold pending the return of the original project manager. Currently we estimate that the review of your application will resume about mid-year and should be completed by the spring of 1977. In the meantime, you may continue operations at the Sequoah facility under the renewal provisions of paragraph 40.43(b) 10 CFR 40.

If there are any further questions please feel free to call.

Sincerely,

Original signed by:
W. T. Crow
