CLOSE-OUT SURVEY (92001)

This refers to the closeout inspection conducted by Mr. D. R. Gibbons of the Region III office on October 9, 1992, of activities authorized by NRC Byproduct Material License No. 48-16296-01, and to the discussion of our findings with Mr. Donald Paschen at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of representative records, independent measurements, and interviews with personnel.

The purpose of the inspection was to determine if all of the licensed material possessed by Midwest Inspection Services was properly disposed of prior to termination of the license on September 28, 1992. As described in the attached report, it appears that licensed material was properly disposed of as outlined in letters and a Form NRC-314 submitted to Region III.

No violations of NRC requirements were identified during the course of this inspection.
