Kerr McGee Nuclear Corporation
ATTN: Mr. W. J. Shelley, Director
Regulation and Control
Kerr McGee Building
Oklahoma City, Oklahoma 73102

License No. SUB-1010

Gentlemen:

This refers to the inspection conducted by Herman J. Paas, Jr. and Ed Johns of this office, on July 28, 29, and 30, 1976, of the activities at your Sequoyah facility authorized by NRC Source Material License No. SUB-1010, and to the discussion of our findings held by Mr. Paas with Messrs. B. E. Brown and C. A. Grossclaude on July 30, 1976.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements and observations by the inspector.

Mr. Paas also reviewed the action you had taken with respect to two items of noncompliance observed during our previous inspection, which was conducted July 7, 8, and 9, 1975. He verified that the corrective action with respect to these items was implemented as stated in your replies of August 13 and 25, 1975, to our letter dated July 28, 1975.

Based on the results of this inspection, it appears that one of your activities was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith. This item of noncompliance has been categorized into the level as described in the correspondence to you dated December 31, 1974.
