REVIEW OF INFORMATION DATED JANUARY 21, 1985, AND ITS SUPPLEMENT DATED APRIL 23, 1985

Background

Combustion Engineering (CE) by letter dated January 21, 1985, and its supplement dated April 23, 1985, submitted page changes to the demonstration section of its SNM-1067 license reflecting the appointment of John F. Gibbons to the position of General Manager, Nuclear Fuel Manufacturing.

Discussion

A. Organization

The CE license specifies the General Manager, Nuclear Fuel Manufacturing, shall have the following minimum qualifications: "The qualifications for this position shall be a Bachelor's Degree in one of the sciences or engineering and five years experience in nuclear fuel fabrication facilities. In addition, at least three years supervisory experience is required as well as an understanding of the nuclear criticality safety, health physics, and industrial safety aspects of fuel handling and knowledge of administrative controls imposed on nuclear fuel handling operations".

The letter dated January 21, 1985, did not indicate Mr. Gibbons met the minimum qualifications for the position. Therefore, it was supplemented by letter dated April 23, 1985, which indicated he did meet all the education and experience requirements for the position.

Nuclear Criticality and Radiation Safety

The change in organization does not require any modification to the license conditions for nuclear criticality or radiation safety.

Environmental Effects

The change in organization will not result in adverse environmental impacts for the facility. The change may be classified as "organizational". Therefore, in accordance with 10 CFR 51.22(c)(11), neither an environmental impact statement nor an environmental assessment is required.

MAY 31 1985

General

The letter dated January 21, 1985, and its supplement dated April 23, 1985, were discussed with Mr. Jerome Roth, Region I Inspector of the facility on May 7, 1985. He foresaw no safety or environmental problem with the change in organization.

Conclusion

The change in organization does not affect the license conditions of the license. Mr. John F. Gibbons, the new General Manager, Nuclear Fuel Manufacturer meets the qualifications of the license for his position. No license amendment is required.
