General Foods Corporation
Technical Center
ATTN: Mr. Eugene Misiaszek,
Site Manager
Prospect Plains Road
Cranbury, New Jersey 08512

Gentlemen:

Subject: Inspection Nos. 30-18930/85-01 and 30-22107/85-01

This refers to the routine safety inspection conducted by Mrs. Teresa Hall Darden of this office on April 17, 1985 of activities authorized by NRC License Nos. 29-19591-01 and 29-19591-02 and to the discussions of our findings held by Mrs. Darden with yourself and Mr. Rhourke of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your licenses. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Our inspector also verified the steps you have taken to correct the violations brought to your attention in the enclosure to our letter dated April 27, 1983. We have no further questions regarding your action at this time.

Within the scope of this inspection, no violations were observed.

During the inspection, wipes to test for removable radioactive contamination were taken and were analysed in our Regional Office Laboratory. The purpose of these independent measurements is to verify your capability for detecting and qualifying removable contamination. The results of our independent analyses showed no significant radioactive contamination.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.
