Gary L. Shear, Chief
Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Shear:

This is in regard to your letter dated November 5, 1992. "Reply to a notice of violation."

Item 1 - The Bicron 2000 Survey instrument to show compliance with 10 CFR part 35, and this survey instrument had not been calibrated from November 8, 1990 through March 6, 1992.

Action Taken -

In reply to a notice of violation, Woodland Medical Group has contacted with Medical Physics Consultants, scheduling visits four times a year, twice at each facility. March and September at Detroit office then June and December at our Novi facility. Each office has two survey meters on hand at all times. When the consultant performs the inspections they will include the survey meter that is due for annual inspection. Medical Physics Consultants maintain a flagging system as a back-up check to insure scheduled inspections and/or calibrations occur in accordance with Nuclear Regulatory Commission licensure requirements. (See attachment)

Respectfully,

Robert W. Bennett, Administrative Director

ATTN: Liz Taylor
Chief Nuclear Medicine Technologist

Dear Ms. Taylor:

Under contract, Medical Physics Consultants, Inc. is to perform one inspection semi-annually (every 6 months) at each facility (Detroit and Novi). The Detroit facility is inspected first (January-March) and third (July-September) quarters; Novi, second (April-June) and fourth (October-December) quarters.

Sincerely,

Christine Widmayer
Accounts Receivable
