Combustion Engineering, Inc.

ATTN: Mr. H. V. Lichtenberger

Vice President, Manufacturing

Nuclear Power Systems

1000 Prospect Hill Road

Windsor, Connecticut 06095

Gentlemen:

This is in response to your letter dated March 21, 1985, requesting an extension in time for initiating the requirements of 10 CFR 70.58(c)(2) at your low enriched uranium fabrication facility located in Hematite, Missouri.

Our review has determined that your request is acceptable and will not decrease the effectiveness of the safeguards program at the C-E Power Systems facility located in Hematite, Missouri, and will not adversely affect the common defense and security nor the public health and safety, and is otherwise in the public interest.

Accordingly, we are adding the following un-numbered license condition to Amendment MPP-4 to your License No. SIM-1067, effective immediately, to read as follows:

Notwithstanding the requirements of 10 CFR 70.58(c)(2) to perform at least every 12 months a review described therein at the C-E Power Systems facility located at Hematite, Missouri (due to begin no later than April 9, 1985), the licensee shall initiate said review no later than April 30, 1985.

This condition expires as of the close of business April 30, 1985.

Sincerely,

Original signed by Willard B. Brown
