Re: Reply to a Notice of Violation  
License No. 34-26163-01  
Docket No. 030-31562

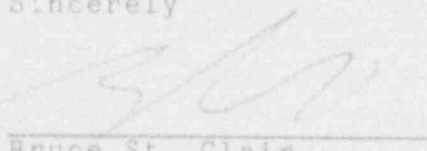

Dear B. J. Holt

This refers to the violation of Item 10(1)(A)(4) of the section of the application titled "Radiation Safety Program", that the Radiation Safety Officer will maintain records as required by the license and the regulations, including personnel exposure records.

I am not contesting the violation during the period 1-1-91 to 3-31-91. To the best of my knowledge the badges were returned to Troxler for reading, the badges were lost in the mail or misplaced at Troxler. During the period not accounted for our asphalt plant was shut down for the winter and the only time we use our Nuclear Gauge is when we are producing asphalt for the State of Ohio.

Commencing 1-1-93 when we return our badges to Troxler for examination I will be sending them registered mail (return receipt required). This way I will know they have received them. If we have not received the results within 30 days from the return receipt I will then contact them.

Sincerely

  
Bruce St. Clair
