

NOTICE OF VIOLATION

Bowser-Morner, Inc.
Dayton, Ohio

License No. 34-17390-01
Docket No. 030-12676

During an NRC inspection conducted on November 20, 1992, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1992), the violations are listed below:

1. Condition 11 of License No. 34-17390-01 requires the Radiation Safety Officer to conduct a biannual audit of licensed activities at the specific use locations listed in Condition 10. The licensee is also required to maintain records of the audits performed.

Contrary to the above, the Radiation Safety Officer has not conducted biannual audits of licensed activities at the specific use locations. Specifically, since 1988, the Radiation Safety Officer has conducted annual audits at the specific use locations listed in Condition 10 of the subject license. In addition, with the exception of the 1991 audit, records of the audits performed have not been maintained.

This is a Severity Level IV violation (Supplement VI).

2. Condition 18 of License No. 34-17390-01 requires that repairs involving replacement of guide rod sleeve bearings be performed by the Radiation Safety Officer.

Contrary to the above, in June 1992, repairs involving replacement of guide rod sleeve bearings were performed by an individual not authorized to do so by the license.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, Bowser-Morner, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois, 60137, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received

within the time specified in this Notice, an order or a demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
