799 Roosevelt Road  
Glen Ellyn, Illinois 60137

Gentlemen:

*efw  
6/85*  
As discussed with Ms. Evelyn Mattson via telephone on March 29, 1985, we do not wish to renew our license #34-06686-02 but rather to amend our license #34-06686-07 to also include the Cesium-137 source which was covered by #34-06686-02. This is a Cs-137 sealed source (Amersham/Searle Model Nos. 850233, 850263, 850213, or 3M Company Model Nos. 4P6M, 4P6E, 4F6S, 4F3D) not exceeding 100 mCi and utilized in a Nuclear Chicago Corporation Model 5179 source holder for level measurement. The remaining sources covered by #34-06686-02 have been disposed of as follows:

1. Iron-55 source for use in Kevex Corporation Model 112 for x-ray fluorescence analysis was returned to Kevex Corporation for disposal on April 17, 1985.
2. Hydrogen-3 sources used for electron capture detection in gas chromatographs were sent to Safety Light Corporation for disposal on April 26, 1985.
3. Nickel-63 source used for electron capture detection in gas chromatographs was sent to NRD Division, Mark IV Industries, for disposal on April 17, 1985.
