Gentlemen:

This refers to the routine safety inspection conducted by Mr. J. E. Hyder of the Los Alamos National Laboratory during the period April 30 through June 2, 1985, of activities authorized by NRC Operating License R-53 for the University of Oklahoma and to the discussion of his findings with members of your staff at the conclusion of the inspection.

Areas examined during the inspection included organization, logs, and records; review and audits; requalification training; procedures; surveillance activities; experiments; fuel-handling activities; radiation control; radwaste management; emergency planning; physical security; and nuclear materials safeguards. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson

E. H. Johnson, Chief
