Dear NRC:

I'm a concerned person living in the immediate area of the Humboldt Bay Nuclear Power Plant. I would like the plant to be permanently closed: decommissioned. The area chosen is not safe and I don't appreciate P.G.&E. trying to get around that fact. No amount of reinforcing a building is going to matter when the building is located in such an unstable area as this power plant. It simply is not safe & I don't want my life or other peoples or animals endangered by this plant being operable or even sitting here in its present state until decisions are made. Please decide to decommission it today.

Sincerely,

Dustin Escano
