MEMORANDUM FOR: Docket File No. 40-8663

FROM: Randall F. Brich, Project Manager
 Licensing Branch 1
 Uranium Recovery Field Office, Region IV

SUBJECT: REVIEW DECOMMISSIONING REPORT - N D RESOURCES, INC.
 NUBETH R&D ISL

Background

By letter dated March 28, 1985, N D Resources, Inc. (NDR) submitted the detailed Decommissioning Report (DR) for the Nubeth R&D ISL project. On November 26, 1984, I visited the NDR site and reviewed records, conducted independent measurements and documented my observations of the recently concluded decommissioning activities (see memorandum to Docket File No. 40-8663, dated January 10, 1985). As concluded in the memorandum, license termination would be contingent upon final notification by NDR that all pertinent Wyoming Department of Environmental Quality (WDEQ) requirements have been or will be met. NDR submitted the DR to provide record of attaining WDEQ requirements and also, to document all decommissioning activities.

Discussion

The DR contains all information and records required by the Commission to be maintained for 5 years, which includes but is not limited to the following: plant decommissioning, site soil survey, well abandonment procedures and approvals, and site reclamation.

The DR documents that all equipment released for unrestricted use met applicable limits, all soils were cleaned to below the standard and wastes were disposed of properly.

JUN 05 1985

By letter dated April 23, 1985 from A. F. Stoick, NDR to R. Ruyle, WDEQ, NDR informed WDEQ that all wells had been plugged in accordance with the WDEQ requirements and that the remaining seeding was completed on April 12-13, 1985.

The WDEQ indicated that they had no objection to termination of the NRC license (telephone conversation between Kathy Ogle and Ed Hawkins on June 4, 1985).

Conclusions and Recommendations

Based on my review of the DR, I conclude that they have successfully decommissioned and reclaimed the site. Therefore, I recommend that NDR be notified, in writing, that Source Material License No. SUA-1331 is terminated, effective immediately.
