Mr. Harley Silver, Project Manager  
Operating Reactor Branch #4  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
7920 Norfolk Avenue  
Bethesda, MD 20014

Subject: Crystal River Unit 3  
Docket No. 50-302  
Operating Licensing No. DPR-72  
Technical Specification Change Request No. 124  
Remote Shutdown System

Dear Sir:

As discussed in our telephone conference, enclosed is a revised Technical Specification page 3/4 3-35, Remote Shutdown Monitoring Instrumentation. This revision combines the current Technical Specification with a portion of our previously proposed Technical Specification change request, TSCRN 124. Specifically, this revision replaces the current readout location, ES Switchgear Room, for several instruments with the readout location from our proposed change request, Remote Shutdown Panel. Our original change request specified operability and surveillance requirements for the control transfer switches and for certain instrumentation and controls on the Remote Shutdown Panel. Since this revision is within the scope of the original change request, which was noticed in the Federal Register, re-noticing should not be necessary.

We understand from conversations with you and the staff that the staff has deferred review of Technical Specification change request for new Remote Shutdown Systems. Please note that this revision does not incorporate the new system into the Technical Specifications but provides an administrative change to the current specification in the form of updated readout locations. This revision is

necessary due to the staff action described above. Florida Power intends to continue pursuit of our initial change request; therefore, please maintain this item active.

Sincerely,

A handwritten signature in cursive script, appearing to read "G. R. Westafer".

G. R. Westafer  
Manager, Nuclear Operations  
Licensing and Fuel Management
