U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

Subject: Beaver Valley Power Station, Unit No. 1 and No. 2  
BV-1 Docket No. 50-334, License No. DPR-66  
BV-2 Docket No. 50-412, License No. NPF-73  
Proposed Operating License Change Request Nos. 205/71  
(TAC Nos. M85081/M85082)

Enclosed are the following:

1. An application for amendment to the above licenses to allow steam generator tube sleeving in accordance with the Westinghouse and the Babcock and Wilcox processes.
2. Documents designated Attachment A-1, A-2, B, C-1, C-2, D and E which set forth, respectively, the change in the technical specifications; the safety analysis (including the no significant hazards evaluation); the typed replacement technical specification pages; proprietary WCAP-13483, Revision 1 and non-proprietary WCAP-13484, Revision 1, "Beaver Valley Units 1 and 2, Westinghouse Series 51 Steam Generator Sleeving Report, Laser Welded Sleeves;" and a Westinghouse application for withholding proprietary information.

As WCAP-13483, Revision 1, contains information proprietary to Westinghouse Electric Corporation, it is supported by an affidavit signed by Westinghouse, the owner of the information. This affidavit sets forth the basis on which the information may be withheld from public disclosure by the Commission and addresses with specificity the considerations listed in paragraph (b) (4) of Section 2.790 of the Commission's regulations.

Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's regulations. Correspondence with respect to the supporting Westinghouse affidavit should reference CAW-92-375 and should be addressed to Nicholas J. Liparulo, Manager of Nuclear Safety and Regulatory Activities, Westinghouse Electric Corporation, P.O. Box 355, Pittsburgh, Pennsylvania 15230-0355.

This change has been reviewed by the Onsite Safety Committee and Offsite Review Committee and was determined to be safe based on the attached safety analysis.

Technical Specification Change Nos. 1A-205/2A-71

Mr. J.D. Sieber:

Attached is a suggested letter to the NRC for submittal of Technical Specification Change 1A-205/2A-71 for Beaver Valley Power Station, Unit Nos. 1 and 2. The proposed amendment would allow sleeving at the steam generator tube support plate and tubesheet regions in accordance with the B&W and Westinghouse processes.

This change has been reviewed by the OSC and ORC and was determined to be safe.
