

DOW CHEMICAL U.S.A.

7/3
0796

MIDLAND, MICHIGAN 48640

February 18, 1975

Directorate of Licensing
Materials Branch
Nuclear Regulatory Commission
Washington, D.C. 20545

Gentlemen:

This is in reference to the renewal of our License 21-00265-04.

Application for renewal was submitted in December, 1973, and a revised application was mailed May 6, 1974. By that time Dow was in the midst of a strike which prevented me from pursuing the matter further. I cannot find a letter from Mr. Nathan Bassin which was a response to the May revised application. I do recall some questions by Mr. Bassin, but cannot respond specifically to them.

I have reviewed the enclosed application carefully, using the check list in Appendix B of the AEC Licensing Guide for Industrial Radiography (November, 1970). I believe the application now contains all the information called for in the Guide.

Thank you for your attention to this matter.

Sincerely,

L. G. Silverstein
