ATTENTION: Mr. David H. Jaffe, Project Manager
Operating Reactors Branch #3

SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit No. 1, Docket No. 50-317
Barton Pressure Transmitters

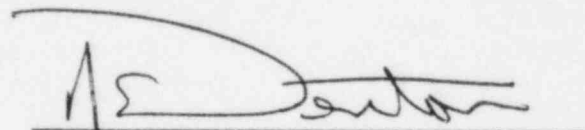

REFERENCE: (1) A. E. Lundvall, Jr. to J. R. Miller letter dated February 22, 1985,
Eighth Cycle License Application

Dear Mr. Jaffe:

This letter is to document an earlier telephone conversation you had with J. A. Mihalcik concerning Barton Pressure Transmitters.

The Barton Pressure Transmitters were not replaced during the Unit 1 seventh refueling as previously planned. Instead we have decided to leave the existing transmitters installed for Unit 1 Cycle 8. Leaving the existing transmitters in the system has not affected the uncertainty factors used in the reload analysis in Reference (1).

Very truly yours,

General Supervisor
Training & Technical Services
