Ms Teresa Darden
U. S. Nuclear Regulatory Commission
Region I
475 Allendale Road
King of Prussia, PA 19406

Dear Ms Darden,

You requested the following information so that you could complete review of our 3/1/89 request to amend our license to add laboratories in the Emmanuel Science Building at 79 Avenue Louis Pasteur, Boston MA

1) Emmanuel Science Building is on Emmanuel College property and being leased from them and renovated for research laboratory space by Beth Israel Hospital. The properties are adjacent to each other. The enclosed architect's drawing shows the route to Emmanuel Science Building (now renamed Research East) from Beth Israel Hospital via Emmanuel College that enables one to remain on either Emmanuel or Beth Israel property. In addition, the red dotted line shows another route that will be available in January 1990 (the projected opening date for the facility). This route will enable one to travel on either Beth Israel or Beth Israel leased property.

2) There will be no patient use in Research East, only research activities.

3) Iodinations greater than 100 μ Ci (current license condition) will be done in designed hoods. The exhaust from the designated iodination hoods will be charcoal filtered. In addition the hood exhausts will be continuously monitored to ensure that releases are less than those required for release to the environment.

4) Radioactive materials will be delivered directly to Research East by the vendors. A radioactive waste storage room is being provided from which radioactive materials will be packed and shipped for disposal.

5) All use of radioactive materials will be conducted in accordance with our current license number 20-0074-18.

Thank you
Sincerely,

MR Kennedy
